

# JBC

The Soldering Co.

## B·IRON

All the power and control  
in a revolutionary Battery-Powered System

# B·IRON

The easiest way of soldering

Our technology lets you work without any limitations

The best solution to suit your needs

Revolutionize your soldering experience with an ergonomic iron designed to provide unique freedom in usage and versatile functionality for an optimized performance.

## Monitor and control

Download B·IRON App onto your own phone

## Cartridge Exchanger

## Tip Cleaning

## Tool Holder & Charger

## Portability

### B-NANO Nano Handle

- Ergonomic & Lightweight
- Labs and R&D
- High-Precision Soldering in hard-to-reach areas

### B-TWEEZERS Nano Tweezers

- Comfort & Precision
- Labs and R&D
- Rework Jobs

### B-100 Light Handle

- Ergonomic & Lightweight
- Labs and R&D
- Individual Jobs

### B-500 Handle

- Power & Capacity
- Production
- Intensive Jobs

## Most Efficient Soldering System

B·IRON uses JBC Exclusive Heating System, which ensures an extremely quick temperature recovery reaching 350°C in less than 3 seconds.

## Where mobility is the key

Experience unbeatable freedom of movement with the B·IRON system, designed to eliminate space limitations and provide maximum flexibility in your workspace.

## The Shortest tip-to-grip distance

The handles are designed to enhance control and precision, bringing your hand closer for better accuracy and less fatigue, ideal for tasks needing fine detail and careful handling.

## Exclusive tip shapes for hard-to-reach areas

JBC tip shapes provide precise access to hard-to-reach areas, making them ideal for intricate work in tight spaces. These specialized tips improve control and efficiency, perfect for tackling demanding tasks with ease.

## Battery-Powered Stations

**B-IRON NANO**  
**Nano Soldering Station**  
High-Precision Soldering in hard-to-reach areas.

**B-IRON TWEEZERS**  
**Rework Station**  
Highest precision when reworking SMDs.

**B-IRON 100**  
**Light Soldering Station**  
Designed for R&D and individual jobs.

**B-IRON 500**  
**Soldering Station**  
For electronic production and intensive jobs.

The backup B-IRON DUAL system ensures continuous work in mass production

**B-IRON DUAL NANO**  
**Nano Soldering Station**  
Unparalleled precision on two workbenches simultaneously.

**B-IRON REWORK**  
**Rework Station**  
Rework SMDs without stopping.

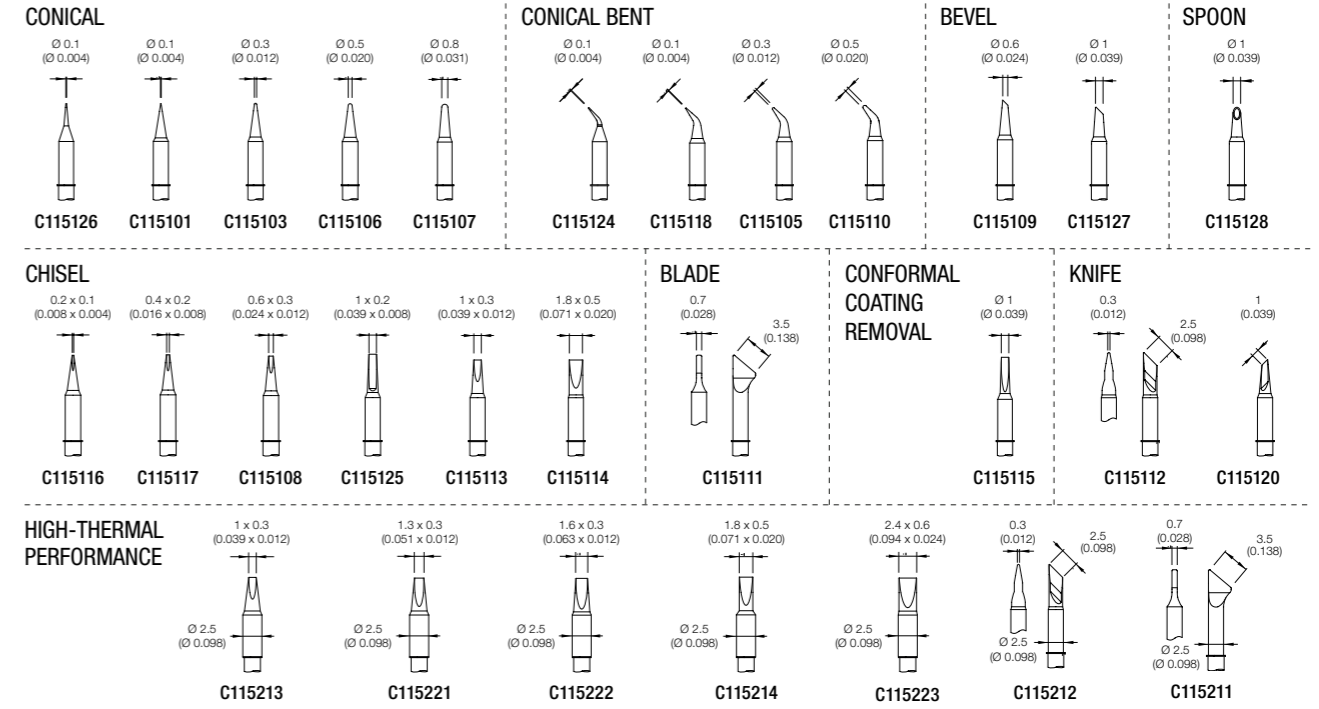

**B-IRON DUAL 500**  
**Soldering Station**  
Allows continuous work in mass production.

## Expansion Kits

Easily expand its capabilities with our Expansion Kits, allowing you to add an extra tool and create the perfect setup for any task.

## C115 Cartridge Range

## C210 Cartridge Range

## THROUGH-HOLE AND CABLE SOLDERING

millimeters / (inches)

**C000000** High Thermal Efficiency Cartridges: These are characterised by their optimised tip geometries which achieve improved thermal efficiencies of up to 40%.
